Behind the Scenes

One word, no spaces. ICD-10 is ICD10.

Across

1 **HIPAA** Federal law that protects patient privacy and the security of health information.

3 **Medical coding** Process of assigning diagnostic codes (like ICD-10) so insurance will cover a visit or procedure.

5 **Superbill** Form that lists the patient's information plus the visit and diagnosis codes used for billing.

7 **Health information technician** Entry-level role that manages electronic medical records and fulfills records requests.

9 **Patient advocate** Professional who helps patients understand bills, insurance, and treatment options (hired by the patient or family).

11 **Health information technology** Software and hardware systems used to maintain patient and practice information.

13 **ICD-10** Codes used to describe the specific diagnosis given by the provider.

15 **Compliance officer** Person who ensures the organization follows state and federal rules on privacy and medical records.

17 **CPC** Highest-level coding certification that shows strong expertise in CPT codes.

19 **Patient navigator** Employee of the medical organization who helps patients schedule services and understand their care.

21 **Healthcare administration** Career field that supports healthcare without requiring direct patient care.

Down

2 **Medical billing** Process of submitting claims to insurance and collecting payment after a visit.

4 **Health information management** Policies and procedures that protect patient data during collection, storage, and release.

6 **CPT** Codes used for procedures and office visits that must match the diagnosis.

8 **EMR** Digital system that stores patient charts and protected health information.

10 **PHI** Information that must be kept private under federal law (includes name, diagnosis, and more).

12 **CCA** Entry-level coding certification that requires a high school diploma.

14 **Medical chronologist** Role that reviews charts to create a timeline of events for legal cases.

16 **Chief nursing officer** Nursing leader who oversees nursing practice and staff in a healthcare organization.

18 **Systems analyst** Specialist who evaluates medical records and financial reports to recommend improvements.

20 **Data architect** Professional who builds and maintains the structure of healthcare databases.

22 **Medical records clerk** Entry-level job that pulls and files paper charts and works with electronic systems.
